Date:

Prepared for:

(Name and address of the University)

IT Department:

(First name, last name and e-mail address of the IT contact responsible for the setup of a license server)

Issued by: Plexim GmbH, Technoparkstrasse 1, 8005 Zurich, Switzerland

PLECS Academic Software Sponsorship Agreement

It is the intention of Plexim GmbH (Plexim) to support

National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute" (the University) with its engineering software tools, and to establish close cooperation and knowledge transfer between Plexim and the University.

The parties agree to the following:

- Plexim will provide the University with fully functional, PLECS Combo and PLECS Coder licenses and maintenance service at no cost.
- These licenses are restricted to use in connection with on-campus computing facilities solely in support of classroom instruction and research activities of students, teaching faculty and research staff. Using the software for any other purpose, including commercial, is expressly prohibited.
- Plexim will issue 50 concurrent (network-based) licenses, but the quantity may be modified based on the University's needs.
- The licenses are non-perpetual and are issued for an initial period of two (2) years. The sponsorship can be renewed on an annual basis thereafter, if the University uses the software and both parties agree to continue this agreement.
- If students or staff use the sponsored PLECS licenses for a research project, they should mention this in publications and presentations of that project.
